Career Objective

As a motivated fresher, I seek an opportunity to apply my growing knowledge of Software development, Data analysis, and AI technologies with sincerity, dedication, and continuous learning. I aim to contribute through efficient problem solving in real world projects while enhancing my technical skills and developing into a responsible and skilled engineer in a growth oriented environment.

Education

- **ITER, SOA University** — *August 2022 – June 2026*
  B.Tech in Computer Science Engineering — Bhubaneswar, India
- **KIIT Higher Secondary School** — *August 2020 – June 2022*
  CHSE, Odisha — Bhubaneswar, India

Internship

- **AIML Internship** — *Aug 2025*
  CTTC authorized by Ministry of MSME — Bhubaneswar, India
  - Completed hands on training in Artificial Intelligence Machine Learning with practical implementations.
  - Strong proficiency in Python and ML libraries for data-driven modeling.
  - Applied Supervised and Unsupervised Learning algorithms to real-world problems.
  - Gained practical exposure to NLP and Computer Vision techniques.
  - Built Deep Learning models using Keras, including Neural Networks and CNNs.

Projects

- **E-Commerce Website** — *March 2024*
  Tools: Python, HTML, CSS, React.js
  - Developed a web-based e-commerce platform with role based access.
  - Implemented product listing, customer management, and order processing.
  - Designed modular workflows for Customer, Registration, and Admin roles.
  - Enabled secure browsing and order placement with admin inventory control.
- **AI-Powered Danger Detection** — *April 2025*
  Tools: Python, YOLOv8, NumPy, SMTP
  - Developed an AI-powered system for real time surveillance and threat detection.
  - Implemented **YOLOv8** to detect knives, guns, and fire from live webcam feeds.
  - Integrated **SMTP-based email alerts** to notify authorities upon detection.
  - Highlighted detected objects in video streams for visual confirmation.
  - Reduced false alerts to enable continuous monitoring.

Skills

- **Programming:** Python, Java
- **AI & Computer Vision:** YOLOv8, Object Detection, Real-Time Video Analysis, Computer Vision
- **Automation:** SMTP Email Automation, Event-Based Notifications
- **Web Development:** HTML, CSS, React.js
- **Databases:** MySQL
- **Tools & Platforms:** VS Code, Webcam Integration
- **Data & Visualization:** MS Excel, Power BI
- **Soft Skills:** Problem Solving, Debugging, Self-Learning, Attention to Detail, Adaptability
